**Subject:** PCB annual testing at SVEC

Good Morning,

As per the agreement with the EPA and Snohomish Health District, Monroe School District will be conducting annual PCB wipe sampling of the PCB remediation project completed in the summer of 2016.

We recently completed the annual surface PCB sampling at SVEC. The sampling was executed in accordance of the 2017 Quality Assurance Project Plan and directive approved by the EPA and Snohomish Health District. We received the testing results back from the lab. The results of the 12 locations sampled were non detect. I have included the report and lab results. Please let me know if you have any questions or concerns regarding the testing.
